

Miami Valley P25 XTS 5000

Front Panel Menu Options

BATT: Displays smart battery information

CALL/Page: Individual Call (P25 systems)

Note: Page works between Motorola and EF Johnson radios.

- LIST

- Use arrow keys to select a name to private call.
- Press PTT while on the selected name and the communication will be directed to that individual only.
- *Individual call is not private; anyone monitoring the system in an “open squelch” mode can hear your conversation.*
- *There is one talkpath on Miami Valley P25, an individual call utilizes the talkpath the same as any other talkgroup.*

DIR: Repeater Mode

- DIR (simplex on the output of repeater)
- RPTR (standard repeater access)

FPP: Front Panel Program, use to add / adjust channel frequency and other settings.

HOME: Hold this button for 3 seconds to return to the programmed “home” channel #UCOM1

MPL: Multiple Personality List, use this to adjust PL and DCS on analog channels.

PWR: Adjust high or low transmit power
