

**Amateur Radio Emergency Services – Hamilton County, Ohio
Frequency List**

ARES will select frequencies from the following list for use during operations (not comprehensive). Program them into your radios for quick access. You may receive a cell phone text from 833-251-6202 as first notification of a standby or activation mode. The 145.190 1R ESS repeater is the default primary repeater during Standby and Activation modes. When normal means of receiving alerts are not available (text, email, phone), monitor the 145.190 1R ESS repeater. If that repeater is down, monitor the 145.190 repeater output simplex frequency with PL 123 (1S ESS). During on air operations, frequencies might be identified by the name only. Refer to the “Situation Awareness Levels” document for operational guidelines during standby or activation modes.

2 Meter Band

Frequency	Offset	Tone Name	Description	Radio Memory
145.010		1D01	WinLink / Local packet net	
145.110	-0.6 Mhz	67 1R WC8OH	W. Central OH wide area	
145.190	-0.6 Mhz	123 1R ESS	W8ESS 519 repeater
